

# MAGNIFIER

Featuring a **dual Butler Amplifier** front-end to ensure **low noise performance and pristine sound quality** Magnifier serves as a **studio grade input buffer, preamp, clean boost** of up to **20db** with full frequency range. It matches the impedance of most pickups to preserve every detail of any instrument plugged into it. With an internal switch you can select between true or buffer bypass.

Controls:

**Bypass Footswitch:** Bypass or engage your effect.

**Boost:** 0-20 db of full frequency clean boost.

**Internal bypass mode switch:** Unscrew bottom plate and locate a mini switch on the right side of the pcb next to the footswitch. Use a small slotted screwdriver to set between true bypass "T" or buffered bypass "B".

Built with the highest quality components available, operates with an external 9-24V DC regulated power supply (- center, + ring). Max current consumption 26mA @ 9V. Using a power supply of 25V DC or more may cause severe damage to the pedal and void warranty.

**Warranty:** **Magnifier** comes with 5 years warranty for all internal parts.
